Welcome and introduction
Patrick Coveney, Group CEO
Agenda

Welcome and introduction
- Patrick Coveney, Group CEO

Our sustainability journey
- Sarah John, Corporate Affairs Director

Our net zero roadmap
- Verity Lawson, Group Head of Sustainability

Sustainable value creation
- Sukh Tiwana, Chief Procurement Officer

Panel discussion and Q&A
Facilitated by Sarah Roff, Group Head of Investor Relations, with:
- Michael Svagdis, CEO North America
- Jeremy Fennell, CEO Continental Europe
- Mark Angela, Chief Business Development & Strategy Officer and CEO of India and EEME

Q&A
Our strategy for delivering long-term sustainable growth and returns

The best part of the journey

**Leading customer proposition**
- Leading brands and innovative concepts
- Great value, taste, quality and service
- Digital customer solutions
- Long-term, mutually beneficial client relationships

**Skilled and engaged colleagues**
- Attraction and retention
- Inclusion and engagement
- Training and development
- Safety and wellbeing

**Long-term growth and returns**
- New business development
- Like-for-like revenue growth
- Profit conversion
- Cash flow generation

**Sustainability**
- Serving our customers responsibly
- Protecting our environment
- Supporting our colleagues and communities
- Upholding high standards of governance
Embedding sustainability

**Purpose**

*not compliance*

- Reimagining food for people and the planet
- Developing sustainable propositions
- Positioning SSP as a sustainable partner of choice for clients and brands
Our sustainability journey
Sarah John, Corporate Affairs Director
# Delivering sustainable value for our stakeholders

## CLIENTS

**Developing an Airport Net Zero Carbon Roadmap**

HKIA strives to become World’s Greenest Airport

## CUSTOMERS

67% of our customers want healthy F&B options when travelling[^1]

**How consumers are making sustainability a growth opportunity**

## BRAND PARTNERS

**M&S resets Plan A with 2040 net-zero target**

Starbucks adds an Extra Shot With the Net Zero Initiative

**JAMIE OLIVER GROUP ANNOUNCES SUSTAINABILITY COMMITMENTS**

Burger King supports farmers in reducing emissions under new partnership

## INVESTORS & LENDERS

**BlackRock CEO Makes the Case for Sustainable Investing**

Sustainability is BlackRock’s new standard for investing.

## COLLEAGUES

New research on the importance of sustainability credentials when attracting and retaining talent

[^1]: Based on data from our 2022 Customer Survey covering 25 markets, 77 locations and 18,000 customers

## SUPPLIERS

**ZERO NET**

67% 64% 56% 46% 40%

**Biofood commits to science-based net zero target**

**NET ZERO BY 2040**

**PepsiCo**

**GOVERNMENTS**

**Pacific nations push for global backing of fossil fuel non-proliferation treaty**

Signatory countries urge world leaders to phase out coal, oil and gas production in line with goal of limiting global heating to 1.5°C

## COMMUNITIES

**There is NO PLANET B**

[^1]: Based on data from our 2022 Customer Survey covering 25 markets, 77 locations and 18,000 customers
Our sustainability journey

**DEFINING**
- Material issues for our business and stakeholders
- Strategic priorities, targets and metrics

**DEVELOPING**
- Governance, skills and capabilities
- Action plans and net zero roadmap
- Reporting and transparency

**DELIVERING**
- Tangible progress against targets
- Validation of science-based targets
- Collaborations and partnerships

"Sustainability is an all-board responsibility and a key item on the Board's agenda. We continue to challenge SSP’s approach, monitor sustainability risks and impacts, and embed sustainability factors and stakeholder views into our decision-making."

Mike Clasper, Chair of SSP plc
Our strategic focus areas

**PRODUCT**
Serving our customers responsibly

- Offering healthier lifestyle choices and satisfying dietary needs
- Sourcing our ingredients and products responsibly and sustainably
- Supporting animal welfare

**PLANET**
Protecting our environment

- Pursuing net zero carbon emissions
- Reducing, reusing and recycling our packaging
- Reducing food waste

**PEOPLE**
Supporting our colleagues and communities

- Treating all our colleagues with care and respect
- Promoting and protecting safety and wellbeing
- Embracing diversity and protecting human rights
- Supporting our communities

Upholding high standards of governance
## Our progress against targets

<table>
<thead>

Our net zero roadmap

Verity Lawson, Group Head of Sustainability
Net Zero in the food sector

CURRENT CHALLENGES

IPCC estimates that global food production is responsible for up to 19.1 billion tonnes of GHG emissions per year – c.37% of global total emissions

FUTURE OPPORTUNITIES

EU approves first methane-busting feed additive for cattle

Special Report on Climate Change and Land — IPCC
What does Net Zero mean for us?

**SCOPE 1**
- Refrigerant gases
- Company vehicles
- Fuel on-site

**SCOPE 2**
- Purchased energy
- Transport & distribution
- Capital goods
- Purchased goods for resale
- Operational waste
- End-of-life of sold products
- Business travel
- Employee commuting
- Purchased goods & services not for resale

**SCOPE 3**

**REDUCE** absolute GHG emissions produced across Scopes 1-3 by **at least 90%**

**REMOVE** residual 10% GHG emissions from the atmosphere

**NET ZERO balance**

*The Net Zero Standard: Science Based Targets Initiative (SBTi)*
Our global carbon footprint (2019 baseline)

1.1 million tonnes CO2e

Scope 3: Purchased goods 78%
Scope 3: Other 5%
Scope 3: Capital goods 6%
Scope 1 & 2 11%

Scope 1 & 2 reduction achieved by 2022 (vs 2019 baseline)

↓ 36%

Intensity

0.4 kg CO2e per £ revenue

1. Other is comprised of: Scope 3 - Fuel and energy-related activities (1.8%), Purchased goods and services not for resale (1.3%), End of life treatment of sold products (0.9%), Waste generated in operations (0.5%), Employee commuting (0.5%), Upstream transportation and distribution (0.2%) and Downstream leased assets (0.2%)
Our global carbon footprint (2019 baseline)

1.1 million tonnes CO2e

Scope 3: Purchased goods 78%

Sustainable value creation
Sukh Tiwana, Chief Procurement Officer
Optimising energy efficiency

**People:** enabling energy-saving behaviours

**Planet:** minimising carbon emissions in pursuit of net-zero

**Profit:** drives significant cost efficiencies for our business

**By end 2022:**

31% reduction in total energy use (vs 2019 baseline), contributing to a 36% reduction in Scope 1 and 2 emissions

- Improving data quality, with fewer estimations
- Switching to more energy efficient equipment, including LED lighting
- Implementing smart building management systems with automated opening/closing procedures, better regulating temperatures (e.g., chillers, heaters) etc.
- Driving energy-saving behaviour change among our colleagues

**From 2023:**

Automated Meter Reader (AMR) system global roll-out

- ½ hourly meter readings, with detailed data analytics and diagnostic reports
- 10% average reduction in energy shown in UK trials where AMRs have been introduced
- 2-year payback expected to be achieved

**Case study: Results of UK AMR trial at M&S Euston Station**

- **Identification:** high energy use when the unit was closed overnight
- **Investigation:** night curtains on chillers were not being properly deployed
- **Action:** re-trained staff on closing procedures and proper use of night curtains on chillers
- **Impact:** 18% reduction in energy use
Designing smart recipes

**Product:** creating great tasting, healthier dishes for our customers

**Planet:** using lower impact ingredients and reducing waste

**Profit:** driving cost efficiencies for our business

---

**Wonky**

Utilise imperfect fruit, veg and other ingredients that otherwise would be wasted

---

**Seasonal**

Utilise seasonal ingredients that reduce food miles and enhance taste

---

**Repurposed**

Repurposing good quality ingredients and trimmings that would otherwise be wasted

---

Case study: Nordics prawn sandwich reformulation

➔ Reduced the amount of prawns and added smoked salmon, egg and spinach resulting in:

- Better tasting and more nutritionally balanced
- Reduced own-brand F&B emissions in the Nordics by c.1%
- More cost effective for our business

BEFORE

AFTER
Utilising lower impact cleaning products

**Product:** safe products with the lowest hazard classifications

**Planet:** reduces CO2e and other environmental impacts

**Profit:** more cost effective for our business

- Successful UK trial in 2022 of new plant-based cleaning products
- Now in process of rolling-out implementation, starting with our Europe region

![SURE - Cradle to Cradle Gold Certified](image)

- 28% reduction in CO2e emissions vs traditional products
- c.9% cost savings for our business
- 100% biodegradable

---

1. Based on an independent OECD 301B assessment. 301B is a globally recognized aerobic biodegradation test that monitors the degree of activity of microorganisms (CO2 evolution) exposed to a material during 28 days, thus resulting in a carbon material reading and the biodegradability of the product.
Working in partnership with Too Good To Go

Product: access to great quality food at lower prices

Planet: reduces food waste and CO2e emissions

Profit: generates income from food that would otherwise be wasted

➔ The world’s largest food saving app
➔ Connects customers to our units that have unsold food surplus at the end of the day
➔ Food is placed into ‘Magic Bags’ that customers buy through the app at a reduced price

By end 2022:

11 markets live

+540k bags of food saved from waste

1,362 CO₂e emissions avoided

1. Assuming an average ‘Magic Bag’ equates to a weight of 1kg which, on average, generates a CO2 footprint of 2.5kg
Panel discussion

Facilitated by Sarah Roff, Group Head of Investor Relations, with:

• Michael Svagdis, CEO North America
• Jeremy Fennell, CEO Continental Europe
• Mark Angela, Chief Business Development & Strategy Officer and CEO of India & EEME
